

Ayor is a petty trader and a mother of six from Tuopare who has been part of Self-Help International since 2023. Before acquiring her tricycle, unreliable transportation often disrupted her market days. She recalls being fully prepared to go to the market, only to wait for hours because no transport was available.

At the conclusion of Tour de Ghana 2025, Ayor acquired one of the motorbikes through a microcredit loan from Self-Help International.

"I danced and screamed with happiness when I received my tricycle," Ayor shared.

Today, she has a reliable means of transporting her goods to the market on time. She can trade freely from one market to another, reduce her financial burden, and strengthen her household income.

Beyond supporting her trading activities, Ayor also earns extra income by transporting people between markets and across neighboring communities.

"This has brought peace to my home," she says, "because we now have an additional source of income and fewer daily worries."
