

Christopher is a 30-year-old maize and sorghum farmer from Kogri-Central.

At the conclusion of Tour de Ghana 2025, Christopher acquired one of the motorbikes through a microcredit loan from Self-Help International.

The tricycle now enables him to transport water to his building site and convey farm inputs such as seed and labor without physical strain.

By eliminating the cost of paying others to fetch water, he can save money, improve efficiency, and expand his farming activities.

Christopher is optimistic that the 2026 farming season will be productive, as a major burden has been lifted.
