

Justine is a committed shareholder who actively supports all Self-Help International activities in Jirapa. However, traveling between communities to attend meetings was often a challenge due to unreliable transportation.

When Justine began building his house in Dantie, he had to pay exorbitant fees to transport construction materials to the site. On his farm, the lack of readily available transport meant he sometimes lost harvested crops to animals before he could move them home.

At the conclusion of Tour de Ghana 2025, Justine acquired one of the motorbikes through a microcredit loan from Self-Help International. It has significantly eased these challenges.

He now uses it to transport building materials, support his electrical work business, and move farm produce safely and on time. The tricycle has also become a shared resource, available to support SHI office activities when needed.

"This tricycle is a blessing to my family," Justine says. "I will save a lot of money this year, protect my harvest, and manage my work and responsibilities more efficiently."
